Claims Status

Claims 28 and 32 remain for examination wherein claim 28 is amended.

Status of Previous Rejections

The previous rejection of claims 27-34 are withdrawn in view of applicant's arguments, amendments and cancellation of claims 27, 29-31, 33 and 34.

DETAILED ACTION

Allowable Subject Matter

Claims 28 and 32 are allowed.

The following is an examiner's statement of reasons for allowance:

Applicant's arguments regarding the criticality of the slag composition and mass throughput rate as well as lack of motive to add titanium to JP '640 are persuasive. JP '640 in view of the ASM Metals Handbook or JP '031 and further in view of Olsson, Taylor and JP '889 does not disclose a method for manufacturing an ultra-low carbon steel sheet with composition C lime by refining in a converter, secondary refining after refining in the converter, continuous casting, hot rolling then coiling wherein at the time of the secondary refining, the molten steel is tapped into a refining vessel, a vacuum immersion pipe having an interior that can be adjusted to a negative pressure is immersed in the molten steel in the refining vessel and stirring gas is blown into the molten steel, wherein the amount of $\text{FeO} + \text{MnO}$ in a slag in the refining vessel is at most 15 mass percent and the throughput at the time of casting is at most 5 tons per minute.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
